

Claude Prompt — K-1 & Tax Return Redaction for Litigation Discovery

CONTEXT (give Claude this background)

We are a property management company responding to a formal discovery request from a former employee who is pursuing a lawsuit. We are required to produce 2020 and 2021 partnership tax returns (Form 1065) for each building we own. My Operations Manager has requested that all returns be redacted before production.

REDACTION RULES (exact rules — do not deviate)

For the Main Tax Returns (Form 1065 and all supporting schedules):

1. **REDACT** all actual dollar/number figures (income, expenses, depreciation, asset values, distributions, capital accounts, etc.)
2. **LEAVE VISIBLE** all percentages (%)
3. **LEAVE VISIBLE** the EIN (Employer Identification Number)
4. **LEAVE VISIBLE** entity names, property names, addresses, and dates
5. **LEAVE VISIBLE** all form labels, line descriptions, and section headers

For the K-1s (Schedule K-1, Partner's Share of Income):

1. **LEAVE VISIBLE** Section J only — the profit %, loss %, and capital % ownership percentages
 2. **REDACT** everything else on the K-1 including: partner name, partner SSN/TIN, dollar amounts, capital account balances, and all other line items
 3. **LEAVE VISIBLE** the EIN of the partnership
-

PROPERTIES IN SCOPE (priority order)

Priority	Property	Notes
1	Arbor Crest Housing	2020 + 2021 returns — large scanned PDF (~234 pages), needs OCR
2	Ruby Diamond Housing LP	2020 + 2021 returns — already downloaded
3	Gates on Manhattan LP	2020 + 2021 returns — already downloaded
4	Wilmington Arms Housing LP	2020 + 2021 returns — already downloaded

Removed from scope: Midtown, Anaheim

TECHNICAL NOTES

- Source files are **scanned (image-only) PDFs** — there is no text layer. You must OCR each page to locate dollar figures before redacting.
 - Redaction must use **black fill boxes** over the text (not just invisible text removal — the numbers must be visually blacked out in the output PDF).
 - Run properties in parallel where possible (2 cores available).
 - Output files should be clearly named, e.g.: `ArboCrest_2020_REDACTED.pdf` , `RubyDiamond_2021_REDACTED.pdf`
-

DELIVERABLE

By end of day, produce redacted PDFs for **at least Arbor Crest and Ruby Diamond** (both 2020 and 2021 = 4 documents minimum). The other two properties (Gates on Manhattan, Wilmington Arms) to follow immediately after.

Confirm each file is complete before moving to the next. Do not send partial redactions.

WHAT TO IGNORE / NOT REDACT

- Do NOT redact EINs
- Do NOT redact percentages anywhere on any form
- Do NOT redact entity/property names
- Do NOT redact Section J of the K-1 (ownership percentages)
- Do NOT redact form labels, line numbers, or descriptions
